

Avinash Kumar

DevOps Engineer

+917319813822 — aviavinashkr007@gmail.com — [Linkedin](#)

PROFESSIONAL SUMMARY

DevOps Engineer with approximately 5 years of experience designing scalable CI/CD architectures, cloud infrastructure, and automation frameworks across Azure and multi-cloud environments. Strong expertise in enterprise-grade DevOps transformation, pipeline standardization, Infrastructure as Code (Terraform), and Kubernetes-based deployments. Proven ability to architect reusable DevOps solutions, enforce governance, and improve system reliability, security, and developer productivity. Experienced in driving DevSecOps practices, automation at scale, and platform engineering initiatives.

TECHNICAL SKILLS

- **Cloud Platforms:** Microsoft Azure (primary), Google Cloud Platform (GCP), AWS , Terraform Cloud
- **CI/CD:** Azure DevOps, GitHub Actions
- **Source Control & Governance:** Git, GitHub, Azure Repos, Docker, Kubernetes
- **Databases:** SQL
- **Artifact Management:** Azure DevOps Artifacts, Docker Hub and ACR
- **Infrastructure as Code:** Terraform, YAML, Bicep (familiar)
- **Scripting & Automation:** PowerShell (primary), Python, Bash
- **Monitoring:** Azure Monitor, Prometheus and Grafana

PROFESSIONAL EXPERIENCE

Accenture

Sep 2021 – Present

DevOps Engineer (Client: Nestlé)

Gurugram, Haryana

- Automated Azure infrastructure provisioning using Terraform, reducing manual effort by 85% and improving accuracy by 90%.
- Led repository migration of 7 Azure DevOps projects to GitHub with zero downtime using automated validation scripts.
- Implemented AI-driven automated code reviews for pull requests, improving code quality and accelerating review cycles.
- Designed and implemented scalable CI/CD pipelines for Azure IaaS and PaaS workloads.
- Developed reusable and standardized Terraform modules to support end-to-end resource provisioning.
- Built a zero-touch smoke testing framework integrated with GitHub Actions and Pester.
- Delivered scalable, automated IT infrastructure for enterprise releases—testing through support.
- Built and maintained multi-cloud workflows supporting both Azure and GCP environments.
- Optimized Terraform module reuse by mirroring GitHub-hosted modules into Azure DevOps Repos.

PROJECTS

Cloud Watch tower

[GitHub Link](#)

Tech Stack: Python, Google Gemini (LLM), MCP, GitHub Actions

- Designed an automated PR scanning to proactively block infrastructure vulnerabilities and prevent the provisioning of unnecessarily expensive cloud resources.
- Integrated Google Gemini (LLM) for intent understanding and decision-making.
- Leveraged Model Context Protocol (MCP) to enable seamless interaction between AI agent and GitHub tools.
- Architected a self-healing CI/CD pipeline capable of automatically downloading pipeline failure logs, diagnosing root causes via the LLM, and generating immediate fix pull requests without human intervention.

EDUCATION

Bachelor of Technology

2017-2021

Maulana Abul Kalam Azad University of Technology B.Tech Information Technology West Bengal, India CGPA - 8.56

CERTIFICATIONS & AWARDS

- Microsoft Certified: DevOps Engineer Expert [AZ-400](#)
- Microsoft Certified: Azure Administrator Associate - [AZ-104](#)
- Microsoft Certified: Azure Fundamentals - [AZ-900](#)
